Investment Objectives and Guidelines

August 2013

OVERVIEW

This document sets forth the objectives, responsibilities, strategies, and guidelines for the management of the Association's operational and reserve investment funds.

Operational Funds consist of undesignated assets which are available for support of the Association's ongoing current activities.

Reserve Funds consist of long term and current assets designated to fulfill funding requirements for two specific purposes: (1) authorized Association activities that exceed revenue sources and (2) the expansion, addition, replacement or repair of major fixed assets of the Association (*i.e. building mechanical components, computer systems, phone systems, etc.*). The fundamental objective of the Reserve Fund is to amass in reserves sufficient assets to maintain the services of the Association through periods of economic downturn, to address issues of critical concerns of the real estate industry and fund the sinking fund set-aside program for major fixed asset expenditures.

OBJECTIVES

- use sound investment vehicles that are adequately diversified to limit exposure to changing economic conditions while combining that with timely market decisions and a reasonable rate of return
- maintain sufficient liquidity to meet daily and projected cash needs of the fund
- Assess and establish the association's investment risk posture as described below.

Investment market return data suggests that, over long periods of time, there is a relationship between the levels of risk (*i.e.*, volatility of investment returns) assumed and the level of returns that can be expected in an investment program. In general, higher risk is associated with higher expected returns.

Given this relationship between risk and return, a fundamental step in developing investment objectives and guidelines for EPCAR is the determination of the association's risk posture. The Investment and Treasury Management Committee has examined both the association's risk tolerance, the **ability** to take on investment risk, and its risk preference, the **willingness** to take on investment risk.

The association's overall risk posture is balanced. There is a desire to obtain the best possible return, yet safely maintain the association's investments on behalf of the members.

RESPONSIBILITIES

Investment and Treasury Management Committee

- implementation of investment objectives and guidelines
- monitor performance of investments assuring that objectives are being met while adhering to the guidelines
- annually review investment objectives and guidelines.
- selection and monitoring the performance of Investment Management Firms
 - at a minimum, every three to five years the Committee will undertake a review and/or search that results in a specific recommendation to the Board of Directors as to which firms will be utilized
 - the primary judgment criteria will be the performance of the Investment Firm as compared to the approved benchmark indices over the course of a full market cycle (three to five years), or as needed depending on performance versus indexes or peer groups.
 -
- monitor the association's operational funds set aside for investment.
- provide direction on rebalancing suggestions made by the Investment Management Firms

Investment Authorization

Dual signatures from any two out of three of the Executive Officer (Association Executive), President and Treasurer of the association are required on any authorizations or documents necessary to be executed in establishing, maintaining or closing account relationships.

Transfers of cash between EPCAR internally established Funds (Operating Fund, Reserve Fund, etc.) shall be reported to the Investment and Treasury Management Committee, as well as the Treasurer of the association, or in their absence to the President of the Association.

Investment Managers shall communicate proposed investment reallocations to the Association Executive and the Investment and Treasury Management Committee for the Committee to approve.

Investment Management Firms

- report on at least a quarterly basis the performance of the total fund investments they are managing
- Provide monthly portfolio, as well as market reports, that keep the committee informed of any material changes in personnel, investment strategies, or other pertinent information that would potentially affect the performance of the fund investments they are managing
- adhere to the EPCAR Investment Guidelines
- rebalance the investment portfolio as needed

INVESTMENT STRATEGIES AND GUIDELINES

Asset Allocation Targets

The asset allocation will be diversified across growth strategies and income strategies. The objective of the growth strategies is to provide a rate of return that will grow the purchasing power of the investments. The objective of the income strategies is to minimize the principle risk and maximize current income. There are two kinds of risk to minimize. Institutional Risk relates to the capacity of the institution to preserve the assets of an investor. Investment Risk relates to the degree to which an investment's principle can fluctuate in value based on market changes.

Asset Categories & Associated Risks

- Investment Options will be made from the following list of categories:

U.S. Domestic Equity Investments

Domestic equity investments should primarily provide appreciation of principal as well as current dividend income and growth of income, with the recognition that this requires the assumption of greater market volatility and risk. Industry and company investments shall be based upon demonstrable analysis of prospects for above average returns based upon each Investment Managers objectives as selected by the Finance Committee. Investments shall be primarily in well-seasoned, quality companies whose securities enjoy marketability adequate for the portfolio. U.S. domestic investments shall be chosen from the New York Stock Exchange, the American Stock Exchange, regional exchanges, and the National over-the-counter market that continually provide liquidity and are of good standing in the investment community. Neither privately held stocks nor letter stock shall be included except when selected as an alternative investment allocation per the Target Asset Mix.

Alternative Investments

Generally, alternatives include private equity, hedge funds, managed futures, real estate, long/short strategies, market neutral and absolute return strategies. Alternative investments offer risk/return profiles that may differ from traditional investments such as publicly-traded stocks, bonds, and cash. Additionally, alternative investments may offer low to no correlation to traditional investments and can have risk adjusted returns that by themselves exceed the risk parameters of

this policy. Given their unique attributes alternative investments are subject to approval by the Finance Committee and are limited to the allocation provided in the Target Asset Mix.

Domestic Fixed Income Investments

Fixed income investments should provide a highly predictable and dependable source of income and reduce volatility of the market value of the total portfolio. The investments shall be limited to government (Federal, State and Local) securities, government agencies, mortgage backed pass-through's (government agencies), corporate bonds, and other asset backed securities deemed by the Investment Manager(s) and the Finance Committee to be appropriate. The maximum duration and maturity should be plus or minus 20% of the representative benchmark for the Investment Manager(s). The credit rating of all fixed income investments must be at least BBB by Standard and Poor's or Baa2 by Moodys. An average rating of AA should be maintained, however, this average may be lower or higher at times and will be monitored by the Finance Committee. Rating restrictions do not apply to Alternative and High Yield Investment Managers; their guidelines supersede these restrictions as selected by the Finance Committee.

Operating Fund Investments will fall within the following Risk Categories as applicable:
